

AIRpipe for Automotive Case Study - June 2014

BMW Brilliance has chosen AIRpipe for their compressed air & gas piping systems for their new manufacturing facility. AIRpipe meets their high automotive production standards for quality, while optimizing their systems. The appealing look of AIRpipe's system further enhanced the clean and innovative theme maintained throughout the facility where tours are given daily.

The System:

- 80 mm (3")
- 50 mm (2")
- 25 mm (1")

Advancing Compressed Air & Gas Systems

Selection
Criteria:

Higher Quality

Aesthetically
Pleasing

Easy Installation
