

AIRpipe Mobility Solutions Case Study - April 2010

Schindler specializes in safe, reliable, and eco-friendly mobility solutions with their elevators, escalators, and moving walks. AIRpipe was the perfect solution for Schindler when they retrofitted an aging carbon steel compressed air system.

With more configurations that are readily available, AIRpipe was able to provide a safe and eco-friendly compressed air system that was easily installed in less time than other technologies.

The System:

- 100 mm (4")
- 50 mm (2")
- 25 mm (1")
