

# AIRpipe for Automotive Case Study – January 2017

Selection  
Criteria:

Air Quality

Eco-Friendly

Quick & Easy  
Installation

U-Haul's newest truck fabrication facility utilizes AIRpipe for their compressed air and inert gas systems. The compressed air is used to run their equipment and assembly stations. The inert gas is used for their clean weld applications.

#### The System:

- 100 mm (4")
- 63 mm (2 ½")
- 50 mm (2")
- 40 mm (1 ½")
- 25 mm (1")

Advancing Compressed Air & Gas Systems
