

Advancing Compressed Air & Gas Systems

## AIRpipe for Fulfillment Centers

### Case Study - August 2017

*The installation went amazingly well and we have had no hiccups as relating to the piping. Our machine that is now online with the larger compressor that was hard piped with your AirPipe runs much more consistently with zero supply drop issues. If/When the need arises to expand our compressed air supply lines, we will be purchasing more of your product.*

– Brad Wolf of Evine

### Selection Criteria:

- ✓ Robust Design
- ✓ Cost Savings
- ✓ Energy Efficiency
- ✓ Easy Installation

### The System:

- 25 mm (1")
- 40 mm (1 ½")
